NEW YORK, June 22 .- New York lost a fine opportunity of regaining first place in the National League pennant race to-day through Mathewson's weakness in the final inning of the second game with the Chicago team. The locals won the first game of the double-header through errors by Taylor and Tinker in the tenth inning. The second game seemed to be as good as won by the home team at the close of the eighth inning, but with one man out in the ninth the visitors began to hit Mathewson all

Trouble Are Disciplined. CHICAGO, June 22.—An American League manager, a star batsman and an umpire in the same organization, were all disciplined by President Ban Johnson to-day as a result of Saturday's Loftus-Burkett incident at St. Louis. In the fuling, Manager Loftus is suspended for five days, Burkett is fined \$50 and Umpire Connolly has received a reprimand by letter.

The facts of the case were brought ou by President Johnson's investigation, and indicate that in the early reports the affair was exaggerated.

In the ruling President Johnson suspends Loftus for coaching from the bench, which is strictly against the rules; fines Burkett for starting a fight on the ballfield, and censures Umpire Connolly for not taking quicker action in the matter, as Burkett once appealed to him to put a stop to the coaching from the bench.

The crowd in New York yesterday was probably the largest Monday gathering that ever witnessed a ball game, unless it happened that a holiday came on Monday. The Business Men's Association at Sioux City has purchased the Kansas City franchise in the Western League. The first series of games to be played at Sloux City will begin July 6. A. B. Beal, former owner of the Minneapolis franchise in the Western League, is one of the promoters

of the deal. The seating capacity of the Muncle ball park will be greatly increased to accommodate the crowds that will witness the games when Indianapolis plays there on Sundays. It would be a great improvement to run special trains to the park on the interurban line, as the facilities for handling

large crowds on the regular line are limited WHEELING WON.

Ryan, turf investment promoter, charging him with grand larceny. This is intended as a test case. If Ryan can be convicted on this charge similar charges will be filed against other turf investment men. He was originally indicted on a charge of embezzlement by bailee, but the charge did not hold, Judge Ryan holding the same as that of a banker.

W. W. CARTER WON AN EXCITING GAME FROM THOMAS HAUSE.

On the Twentieth Hole Hause's Caddie Picked Up the Ball-Match Was Given to Carter, One Up.

The first half of the second round of the spring championship for the Lennon cup was played yesterday afternoon at Riverside. Although a steady rain prevailed all day it did not stop the golfers, and one of the best day's golf of the tournament was brought to a close. The playing of Carter again proved the feature of the day. He defeated Thomas fore-caddie picking up his ball by mistake.

Interest in Collis-Fullerton Match. Great interest is being taken in the match between Harry Collis and Robert Fullerton, to be played at the Country Club Thursday. It will be a thirty-six hole match, the morning play starting at 9 o'clock and continuing at 2 o'clock. Both players are playing very good golf and a

very interesting match is expected.

PHILIPPINE EXHIBITS

Fine Display to Be Made at the Coming World's Fair.

World's Fair Bulletin Strange and wonderful things from the Philippine islands will be shown in grand exhibit covering the world's fair grounds at St. Louis

The insular government has made a liberal appropriation for this exhibit and the sum will be still further increased by individuals and commercial organizations in the American possessions in the Pacific ocean. The large area set apart for the exhibits will teem with life and industry, and the many phases of the Philippine life will be accurately portrayed. All of the useful and many of the curious products of the islands will be shown and the theory of the exposition to show processes along with the finished product is tenaciously adhered to. The forty-acre exhib-ST. LOUIS, June 22.-Circuit Attorney it of the Philippine archipelago is on rolling piece of ground immediately west of the Palace of Agriculture. A portion of Arrowhead lake is included. The Filipinos will reproduce on the world's fair grounds typical Filipina villages; for example, a lake dwelling built upon the wooden uprights. A market square will be constructed with buildings of varied architecture. Typical Filipino industries will be produced and the rites and ceremonies up the population of the villages. One building will be devoted to agriculture, in devoted to forestry. This structure, feet long and 40 feet wide, is to be built of timber and palms representative of the most important Philippine species. In the frame of the building, boards twenty-two feet long and the greatest possible width will be shown. Tall timber, bamboo, etc. will be shown in a rotunda, which will cul-minate in a tower 100 feet high. A part of the building will be devoted to minor products of the forest, such as gutta percha, caoutchoue, the chief resin gums, olea-

ginous plants and seeds, oils, perfumes, tan barks, dye stuffs, medicinal plants, One pavilion will be devoted to illustrating the work of the Filipino women nother will contain a war exhibit, contributions to which will be made by native Filipinos and by Americans who have seen service in the archipelago. A pavilion will be devoted to a Filipino library and lecture

A valuable feature of the exhibit will consist of a third-class observatory of the Philinnine islands made by the meteorological observatory at Manila. It will contain not the match on the twentieth hole by his only all the instruments, but also charts and maps showing the climatological conditions of the Philippine archipelago, rain charts, charts representing the isobars and isotherms. Others will illustrate the pressure of air, trade winds, typhoons, etc. The fibre exhibit of the Philippines will embrace the Manila plant, a banana tree by steady playing, was leading Carter 3 bearing inedible fruit. Its fibre produces the strongest ropes and cables made. as if Carter was defeated, but by playing bwn in the archipelago. All sorts of manufactured fabrics from veg. etable fibrer will be shown, from the coarsest burlaps and rattan mattings to the wonderfully dainty laces for which the Filipino women are famed. The more common commercial fibres of the islands will be represented by a large collection, showing all the commercial grades, the amount of fibre produced by a single plant, the amount produced on a given area, and the different qualities pro-

washing will be carried on by natives. walls of Manila will mark the main entrance to the Philippine exhibit. The amusements of the Filipinos will form a feature of the exhibit of great interest to visitors. A Filipino theater will be con-

given by the natives. A typical orchestra will be provided, operas presented, and vaudeville performances rendered. A battalion of Philippine scouts will attached to the exhibit. A battalion will consist of four companies, and will be under the command of a regular army officer. The four principal Filipino tribes will be represented in the military-a company each of Macabebes, Tagals, Viscayans and Ilo-

An interesting feature of this military exhibit will be the collection of weapons, many of which were taken from the native soldiers when war was in progress. Some of the bolos, war clubs with heads at either end, are elaborately carved. The spears, too, death-dealing in war, make splendid decorations in times of peace. The bow and arrow, a most primitive means of offense, were used by the Filipinos in remote sections until recent years, and the collection shown embraces many specimens of these. Many of the rifles captured from the Filipinos are of ancient Spanish manufacture, and the contrast between them and the splendid Krag-Joergensen rifles which the Filipinos were compelled to face when fighting the American soldiers is striking. All the buildings in the Philippine exhibit will be constructed of native materials by native workmen, and when completed on will have an accurate picture of what life really is in the Philippines.

SAND FILTRATION PREFERRED.

New German Process of Water Purifiention Discussed.

Philadelphia Press. The announcement before the Chemical Congress in Berlin the other day by Prof. Proskauer of the result of recent experiments on the sterilization of drinking water with ozone is accepted by authorities on hygiene in this country as a triumph and a great success-so far as it goes. Its use will be entirely governed by the conditions of the waters in the specific locality in | Flora S. Wulschner to Henry R. Bliss, which it is purposed employing it. Therefore, it will never be used in this city. Professor Bergey, assistant instructor of hygiene at the University of Pennsylvania, said that while the ozone method will destroy all bacteria existent in the water, it will not clarify it. Therefore in towns and cities such as Philadelphia, where the of Lot 158, Johnson & Hogshire's East that Ryan's relations with his patrons were illustrated in them. While the experiments with ozone as a sterilizer and its practical application are original with Professor Proskauer and the German Imperial Health Office, the practicability of the chemical process of filtration by the use of hydrogen peroxide, bromine, etc., has been long known; but has never been put into use on account of the strong public aversion to anything in the least suggestive of poison. According to Dr. A. C. Abbott, chief bac-teriologist of the Bureau of Health, the use of hydrogen peroxide was suggested (but not resorted to) for the purification of the waters in the Queen Lane reservoir at the time of the severe epidemic occasioned by their pollution about seven years ago. He said that notwithstanding the fact that the ozone process is cheaper it would not replace the present system in use here.

The Tyfold Collar

The picture shows how the collar is cut out on each side to allow for adjusting a neck tie without springing the collar open. The collar comes close together in front, it keeps the tie in place and you don't see the cut-out part. Besides the tie is retained just over the button, which is also kept out of sight. Your summer comfort will be increased if you wear one, and you'll thank us for the style. Dealers sell them.
